AMENDMENTS TO THE SPECIFICATION

Please add the following three new paragraphs before the last paragraph on page 10:

A preferred fuel has the following properties:

 T_{10} , °F <= 140; T_{50} , °F > 215 <= 220; T_{90} , °F < 330 RVP, psi <= 7.0; S, ppmw <= 50; oxygen, wt% <= 3.5; aromatics, vol% of not more than 28; olefins, vol% <= 10; benzene, vol% < 1.0; paraffins, vol% <= 75; API° >= 59.

Another preferred fuel has the following properties:

 T_{10} , °F <= 140; T_{50} , °F > 215 <= 220; T_{90} , °F < 330 RVP, psi <= 7.0; S, ppmw <= 50; oxygen, wt% <= 1.5-2.9; aromatics, vol% <= 35; olefins, vol% <= 10; benzene, vol% < 1.0; paraffins, vol% <= 75; API° >= 59.

Preferably, the fuels have a RVP psi of 6.6 to 6.9, more preferably a RVP psi of 6.6 maximum, a T₉₀ °F of 315-330, more preferably 315-325, a T₅₀ °F of 215 to 218, a sulfur content in ppmw of < = 35, preferably not more than 25, an oxygen content in wt% of < = 2, an aromatics content of not more than 28 vol%, more preferably 10 to 20 vol%, and a benzene content of not more than 0.80 vol%, preferably not more than 0.70 vol%.
